

We're committed to providing high product quality and service that exceeds our customers' expectations.

Engineering ropes for all applications

At Total Rope Solutions we realised that our customers need a company that has a wide range of stock and fittings. So we hold one of the largest volumes of stock in the UK.

We can offer all our customers quality products and excellent service at a competitive price.

We stock from 1mm up to 52mm in all constructions. All ropes are manufactured to the relevant BSEN standards and come complete with test certificates.
