

We're committed to providing high product quality and service that exceeds our customers' expectations.

Our fibre takes the strain!

At Total Ropes Solution we are able to offer a wide range of quality fibre, natural fibre and man made ropes.

All our ropes come in a wide range of diameters ranging from 2mm twine to 32mm thick rope. Ropes can be made from a variety of different materials: natural ropes (sisal, jute, manila, hemp and cotton) or man-made rope (nylon, staple spun, polyester, braided, polypropylene and Hempex).

We manufacture cargo nets and also offer a full range of hand and mechanical splicing to suit all types of fibre ropes. Our sales team is always ready to help and can advise you on selecting the best rope for your application.
