

## Installation

A full installation service is available for any type of Lifting Gear i.e. Runways, Swing Jibs, and supporting structures.

All work carried out by Qualified Engineers.

Splicing and Rigging either on site or inhouse

## Testing Services

We offer a full testing service either in house using our 100 tonne test bed or onsite using our 50 tonne load cell or our 10 tonne test weights.

### Test Bed

We now have a 100 tonne Test Bed installed so we can offer a full inhouse Testing Service which together with our onsite testing will provide all our customers with a full range of options for their Testing/ Inspection requirements.

We have a 75 tonne calibrated load cell which we use onsite and our full range of test weights gives us a comprehensive range of onsite testing capabilities.

Give us a call with your testing enquiries and you may be suprised at our competitive rates and the quality of our service
